GUIDED SELF-CARE

Healthy eating (page 6)

- Eat a combination of different foods, including staple foods (such as cereals like wheat, barley, rye, maize or rice, or roots such as potato, yam, taro or cassava), legumes (such as lentils and beans), plenty of fresh vegetables, and fruit of various
- Consume at least 400 grams (i.e., five portions) of fruit and vegetables per day, excluding potatoes, sweet potatoes, cassava and other starchy roots.
- Keep total fat intake to less than 30% of total energy intake to help prevent unhealthy weight gain, ensuring that unsaturated fats (found in fish, avocado, nuts, and sunflower, soybean, canola and olive oils) are consumed rather than saturated fats (found in fatty meat, butter, palm and coconut oil, cream, cheese, ghee and lard) and trans-fats of all kinds.
- Limit sugar intake to less than 10% of total energy intake (ideally below 5%, or roughly 25 grams for an adult), which applies to free sugars added to foods and drinks, as well as sugars naturally present in honey, syrups, fruit juices and fruit juice concentrates.
- Keep salt intake to less than 5 grams per day (equivalent to about one teaspoon) and use iodized salt.

Exercise routine (page 7)

- Muscle-Strengthening: Incorporate moderate- or greater-intensity muscle-strengthening activities involving all major muscle groups on 2 or more days a week, as these provide additional health benefits.
- Older Adults (65+ years: Follow the same aerobic and strength guidelines as younger adults, with an added emphasis on varied, multicomponent physical activity that prioritizes functional balance and strength training on 3 or more days a week to prevent falls.
- Children and Adolescents (aged 5-17 years: Average 60 minutes per day of moderate-to-vigorous intensity physical activity, mostly aerobic, across the week. Incorporate vigorous-intensity aerobic activities, as well as those that strengthen muscle and bone, at least 3 days a week.
- Limit Sedentary Behavior: Replace sedentary time with physical activity of any intensity, as being physically active helps reduce the detrimental health effects of high levels of sitting.

Stress management (page 8)

The World Health Organization (WHO) explains that stress is a normal reaction to difficult challenges, but too much of it hurts your health.

The WHO recommends these quick steps:

- Ground yourself: Focus on the present moment when thoughts race.

- Unhook from worries: Notice stressful thoughts without letting them control you.
- Act on what matters: Let your core values guide your actions, even under pressure.
- Be kind to yourself: Practice patience and self-compassion.
- Keep daily routines: Stick to consistent sleep, eating, and activity schedules.
- Stay connected: Talk to friends and family for support.
- Limit media overload: Take breaks from stressful news.

Sleep hygiene (page 9)

The World Health Organization (WHO) emphasizes sleep as a vital pillar of health, supporting immune function, mental wellness, and cognitive recovery.

Core Principles:

- Consistency: Maintain fixed wake-up and sleep times to regulate circadian rhythms.
- Environment: Keep bedrooms dark, quiet, and comfortable.
- Lifestyle: Exercise regularly, avoid caffeine and heavy meals close to bedtime, and limit alcohol and tobacco.

WHO Sleep Duration Guidelines for Young Children:

- Newborns (0-3 months): 14 to 17 hours (with safe back-sleeping practices).
- Infants (4-11 months): 12 to 16 hours, including naps.
- Toddlers (1-2 years): 11 to 14 hours, including naps.
- Young Children (3-4 years): 10 to 13 hours, with reduced screen time and active daily play

Hydration management (page 10)

World Health Organization (WHO) hydration management centers on oral rehydration therapy (ORT), categorizing treatment into three distinct clinical plans:

- Plan A (No Dehydration): Increase fluid intake at home, continue feeding, and administer 10 to 20 mg of elemental zinc daily for 10 to 14 days.
- Plan B (Some Dehydration): Administer 75\text{ mL/kg} of low-osmolarity Oral Rehydration Salts (ORS) over a 4-hour period in a healthcare setting.
- Plan C (Severe Dehydration): Initiate rapid intravenous fluid resuscitation
- (Ringer's Lactate) immediately, transitioning to oral ORS as soon as the patient can drink.

Weight management tips (page 11)

The World Health Organization (WHO) recommends a lifelong approach to weight management focusing on a balanced diet and regular physical activity:

- Improve Diet Quality: Limit total fat intake to under 30% of total energy, prioritizing unsaturated fats (like plant oils, fish, and nuts) over saturated and trans fats.
- Cut Sugars and Salt: Reduce free sugars to less than 10% (ideally under 5%) of daily energy intake and limit sodium.
- Increase Plant-Based Foods: Eat at least 400 grams (5 portions) of fruits, vegetables, whole grains, and legumes (lentils, beans) daily.
- Stay Physically Active: Adults should aim for at least 150 to 300 minutes of moderate-intensity aerobic activity per week (or equivalent vigorous activity) to prevent unhealthy weight gain.
- Reduce Sedentary Time: Limit prolonged sitting and screen time for both adults and children.

PMOS RISK ASSESSMENT

Emergency signs (page 15)
Calculating the results

Note: The PMOS Health Assessment does not diagnose PMOS. It is intended only for risk identification and health awareness. A moderate- or high-risk result does not confirm PMOS; users are encouraged to consult a qualified healthcare professional for proper assessment and diagnosis.

Emergency signs (page 16)

Low Risk

The respondent reports few or no symptoms and risk factors associated with hormonal and metabolic reproductive health concerns

Mild Risk

The respondent reports a limited number of symptoms and risk factors that may indicate emerging hormonal or metabolic reproductive health concerns

Moderate Risk

The respondent reports multiple symptoms and risk factors associated with hormonal ana metabolic reproductive health concerns, suggesting an increased likelihood of underlying reproductive health issues that warrant further clinical assessment

High Risk

The respondent reports numerous symptoms and risk factors associated with hormonal and metabolic reproductive health concerns, indicating a greater Likelihood or significant reproductive health issues.

Note: The PMOS Health Assessment does not diagnose PMOS. It is intended only for risk identification and health awareness. A moderate- or high-risk result does not confirm PMOS; users are encouraged to consult a qualified healthcare professional for proper assessment and diagnosis.

MEAL GUIDE (Page 21)

A. CATEGORY: FRUITS (ITEMS 1 TO 10)

1. Avocado

   · Serving: ½ medium (~100g)
   · Energy: 160 kcal Carbs: 8.5g Fiber: 6.7g Protein: 2.0g Fat: 14.7g
   · Micronutrients: Vit C (10mg), Potas (485mg), Vit E, Folate.
   · Implementation: Low net carbs (1.8g). Rich in MUFA fats which delay gastric emptying and flatten postprandial glucose spikes.

2. Guava

   · Serving: 1 medium fruit (~100g)
   · Energy: 68 kcal Carbs: 14.3g Fiber: 5.4g Sugar: 8.9g Protein: 2.5g
   · Micronutrients: Vit C (228.3mg), Potas (417mg), Vit A.
   · Implementation: Exceptional Vit C lowers systemic oxidative stress. High insoluble fiber supports gut microbiome health.

3. Strawberries

   · Serving: 1 cup halves (~152g)
   · Energy: 32 kcal/100g Carbs: 7.7g Fiber: 2.0g Sugar: 4.9g Protein: 0.7g
   · Micronutrients: Vit C (58.8mg), Potas (153mg), Folate.
   · Implementation: Low glycemic load. Anthocyanin antioxidants enhance peripheral insulin sensitivity in tissue

4. Raspberries

- Serving: 1 cup (~123g)
- Energy: 52 kcal/100g Carbs: 11.9g Fiber: 6.5g Sugar: 4.4g Protein: 1.2g
- Micronutrients: Vit C (26.2mg), Potas (151mg), Magnesium.
- Implementation: Over 50% carb mass is fiber. Ellagitannins reduce inflammatory cytokines in metabolic tissues.

5. Blueberries

- Serving: 1 cup (~148g)
- Energy: 57 kcal/100g Carbs: 14.5g Fiber: 2.4g Sugar: 10.0g Protein: 0.7g
- Micronutrients: Vit C (9.7mg), Vit K, Anthocyanins.
- Implementation: High polyphenol density improves vascular endothelial function and lipid peroxidation markers

6. Blackberries

- Serving: 1 cup (~144g)
- Energy: 43 kcal/100g Carbs: 9.6g Fiber: 5.3g Sugar: 4.9g Protein: 1.4g
- Micronutrients: Vit C (21mg), Vit K (19.8µg), Potassium.
- Implementation: Excellent fiber-to-sugar ratio. Promotes short-chain fatty acid (SCFA) production in gut microbiome.

7. Green Kiwi

- Serving: 1 medium fruit (~69g)
- Energy: 61 kcal/100g Carbs: 14.7g Fiber: 3.0g Sugar: 9.0g Protein: 1.1g
- Micronutrients: Vit C (92.7mg), Potas (312mg), Vit E.
- Implementation: Actinidin enzyme assists in gastrointestinal protein absorption. Great low-GI snack choice.

8. Papaya

- Serving: 1 cup cubed (~145g)
- Energy: 43 kcal/100g Carbs: 10.8g Fiber: 1.7g Sugar: 7.8g Protein: 0.5g
- Micronutrients: Vit C (60.9mg), Potas (182mg), Beta-Carotene.

- Implementation: Papain enzyme aids protein breakdown. Low calorie density allows flexible meal plan volume.

9. Apple (with skin)

- Serving: 1 medium fruit (~182g)
- Energy: 52 kcal/100g Carbs: 13.8g Fiber: 2.4g Sugar: 10.4g Protein: 0.3g
- Micronutrients: Vit C (4.6mg), Potas (107mg), Quercetin.
- Implementation: Pectin soluble fiber delays digestion. Quercetin acts as a natural antioxidant reducing systemic inflammation.

10. Pear (with skin) Serving: 1 medium fruit (~178g)

- Energy: 57 kcal/100g Carbs: 15.2g Fiber: 3.1g Sugar: 9.8g Protein: 0.4g
- Micronutrients: Vit C (4.3mg), Potas (116mg), Copper.
- Implementation: Skin contains significant insoluble fiber; helps regulate bowel transit and blunts glycemic impact.

11. Orange

- Serving: 1 medium (~131g)
- Energy: 47 kcal/100g Carbs: 11.8g Fiber: 2.4g Sugar: 9.3g Protein: 0.9g
- Micronutrients: Vit C (53.2mg), Potas (181mg), Folate.
- Implementation: Whole fruit retains fiber matrix; recommend over fruit juice to avoid rapid fructose absorption.

12. Cantaloupe

- Serving: 1 cup cubed (~160g)
- Energy: 34 kcal/100g Carbs: 8.2g Fiber: 0.9g Sugar: 7.9g Protein: 0.8g
- Micronutrients: Vit C (36.7mg), Vit A (169µg RAE).
- Implementation: High water content (90%); provides electrolyte balance and antioxidant support with minimal caloric load.

13. Plum

- Serving: 1 medium (~66g)

- Energy: 46 kcal/100g Carbs: 11.4g Fiber: 1.4g Sugar: 9.9g Protein: 0.7g
- Micronutrients: Vit C (9.5mg), Vit K (6.4µg), Potassium.
- Implementation: Rich in anthocyanins and neochlorogenic acid which attenuate metabolic syndrome markers.

14. Pomegranate Arils

- Serving: ½ cup arils (~87g)
- Energy: 83 kcal/100g Carbs: 18.7g Fiber: 4.0g Sugar: 13.7g Protein: 1.7g
- Micronutrients: Vit C (10.2mg), Potas (236mg), Punicalagins.
- Implementation: Bioactive polyphenols significantly reduce hs-CRP and serum inflammatory markers elevated in PCOS.

15. Dragon Fruit (Pitaya)

- Serving: 1 cup cubed (~140g)
- Energy: 57 kcal/100g Carbs: 13.0g Fiber: 3.1g Sugar: 7.7g Protein: 1.2g
- Micronutrients: Vit C (4.0mg), Iron (0.7mg), Magnesium.
- Implementation: Seeds contain prebiotic fiber and essential fatty acids, supporting gut health and glycemic control.

16. Pomelo

- Serving: 1 cup sections (~190g)
- Energy: 38 kcal/100g Carbs: 9.6g Fiber: 1.0g Sugar: 7.0g Protein: 0.8g
- Micronutrients: Vit C (61.0mg), Potas (216mg).
- Implementation: High Vit C density. Note: Contains furanocoumarins; flag CYP3A4 medication interaction in app profile.

17. Star Fruit (Carambola)

- Serving: 1 medium (~91g)
- Energy: 31 kcal/100g Carbs: 6.7g Fiber: 2.8g Sugar: 4.0g Protein: 1.0g
- Micronutrients: Vit C (34.4mg), Potas (133mg), Copper.
- Implementation Note: Extremely low GI.

- SAFETY FLAG: Auto-hide in app if user profile indicates renal impairment/kidney disease due to caramboxin.

18. Lanzones (Langsat)

- Serving: 5-6 fruits (~100g)
- Energy: 57 kcal/100g Carbs: 14.0g Fiber: 2.0g Sugar: 8.0g Protein: 0.8g
- Micronutrients: Vit C (10mg), Potas (275mg), B-Vitamins.
- Implementation: Philippine local staple; provides moderate GI carbohydrates combined with natural polyphenols.

19. Peach

- Serving: 1 medium (~150g)
- Energy: 39 kcal/100g Carbs: 9.5g Fiber: 1.5g Sugar: 8.4g Protein: 0.9g
- Micronutrients: Vit C (6.6mg), Potas (190mg), Niacin.
- Implementation: Low GI fruit; skin contains carotenoids and chlorogenic acid supporting metabolic health.

20. Mango (Ripe / Sweet - Mangga)

- Serving: 1 cup sliced (~165g)
- Energy: 60 kcal/100g | Carbs: 15.0g | Fiber: 1.6g | Sugar: 13.7g | Protein: 0.8g | Fat: 0.4g
- Micronutrients: Vit C (36.4mg), Vit A (54µg RAE), Mangiferin, Folate.
- Implementation: Contains bioactive xanthone mangiferin, which exhibits anti-diabetic and metabolic-stabilizing properties. Pair with a protein or fat source to flatten glycemic spikes.

21. Pineapple (Nenas / Pinya)

- Serving: 1 cup chunks (~165g)
- Energy: 50 kcal/100g | Carbs: 13.1g | Fiber: 1.4g | Sugar: 9.9g | Protein: 0.5g | Fat: 0.1g
- Micronutrients: Vit C (47.8mg), Manganese (0.9mg), Bromelain.

- Implementation: Bromelain proteolytic enzyme complex acts as a powerful anti-inflammatory agent, helping reduce systemic tissue edema and pelvic inflammation.

B. CATEGORY: VEGETABLES

1. Spinach

- Serving: 2 cups raw (~60g)
- Energy: 23 kcal/100g Carbs: 3.6g Fiber: 2.2g Protein: 2.9g
- Micronutrients: Folate (194µg), Vit A, Vit K, Iron, Mag (79mg).
- Implementation: High magnesium enhances cellular insulin sensitivity and assists in LH/FSH balance.

2. Kale

- Serving: 1 cup chopped (~67g)
- Energy: 35 kcal/100g Carbs: 4.4g Fiber: 4.1g Protein: 2.9g
- Micronutrients: Vit C (93mg), Vit K (389µg), Calcium.
- Implementation: Dense glucosinolate content supports phase II liver detoxification of excess circulating estrogens.

3. Cauliflower

- Serving: 1 cup chopped (~107g)
- Energy: 25 kcal/100g Carbs: 5.0g Fiber: 2.0g Protein: 1.9g
- Micronutrients: Vit C (48.2mg), Choline, Vit K.
- Implementation: Versatile low-carb rice/mash substitute. Choline supports hepatic fat metabolism in PCOS-related NAFLD.

4. Bitter Gourd (Ampalaya)

- Serving: 1 cup chopped (~93g)
- Energy: 17 kcal/100g Carbs: 3.7g Fiber: 2.8g Protein: 1.0g
- Micronutrients: Vit C (84mg), Charantin, Polypeptide-p, Folate.

- Implementation: Bioactive charantin exerts insulin-mimetic action, directly lowering postprandial blood glucose.

5. Moringa Leaves (Malunggay)

- Serving: 1 cup fresh (~21g)
- Energy: 64 kcal/100g Carbs: 8.3g Fiber: 2.0g Protein: 9.4g
- Micronutrients: Vit C (51.7mg), Calcium (185mg), Iron.
- Implementation: Outstanding plant protein and iron density for greens; reduces chronic low-grade inflammation.

6. Green Cabbage

- Serving: 1 cup chopped (~89g)
- Energy: 25 kcal/100g Carbs: 5.8g Fiber: 2.5g Protein: 1.3g
- Micronutrients: Vit C (36.6mg), Vit K (76µg), Glutamine.
- Implementation: Glutamine supports intestinal mucosal barrier integrity, reducing endotoxin-induced insulin resistance.

7. Brussels Sprouts

- Serving: 1 cup (~88g)
- Energy: 43 kcal/100g Carbs: 9.0g Fiber: 3.8g Protein: 3.4g
- Micronutrients: Vit C (85mg), Vit K (177µg), Folate.
- Implementation: High fiber density delays carbohydrate digestion. Sulforaphane supports hepatic hormone clearance.

8. Asparagus

- Serving: 4 spears (~60g)
- Energy: 20 kcal/100g Carbs: 3.9g Fiber: 2.1g Protein: 2.2g
- Micronutrients: Folate (52µg), Vit K (41.6µg), Chromium.
- Implementation: Chromium is a essential cofactor for insulin receptor activity, enhancing glucose uptake efficiency.

9. Zucchini

- Serving: 1 cup sliced (~113g)
- Energy: 17 kcal/100g Carbs: 3.1g Fiber: 1.0g Protein: 1.2g
- Micronutrients: Vit C (17.9mg), Potas (261mg), Vit B6.
- Implementation: Very low calorie and carb density; ideal volume ingredient for balancing meal caloric density.

10. Eggplant (Talong)

- Serving: 1 cup cooked (~99g)
- Energy: 25 kcal/100g Carbs: 5.9g Fiber: 3.0g Protein: 1.0g
- Micronutrients: Nasunin (Antioxidant), Potas, Vit B6.
- Implementation: Skin nasunin protects vascular cell membranes from lipid peroxidation in metabolic syndrome.

11. Okra

- Serving: 8 pods (~80g)
- Energy: 33 kcal/100g Carbs: 7.5g Fiber: 3.2g Protein: 1.9g
- Micronutrients: Vit C (23mg), Folate (60µg), Magnesium.
- Implementation: Soluble mucilage fiber binds luminal cholesterol and flattens postprandial glucose absorption curves.

12. Cucumber (with peel) Serving: 1 cup sliced (~104g)

- Energy: 15 kcal/100g Carbs: 3.6g Fiber: 0.5g Protein: 0.7g
- Micronutrients: Vit K (16.4µg), Potas (147mg), Silica.
- Implementation: High hydration index; peel provides silica and flavonoids supporting connective tissue health.

13. Bell Pepper (Red)

- Serving: 1 cup chopped (~149g)
- Energy: 26 kcal/100g Carbs: 6.0g Fiber: 2.1g Protein: 1.0g
- Micronutrients: Vit C (127.7mg), Vit A, Capsaicin.

- Implementation: Delivers over 140% daily Vit C per serving, combating elevated ROS levels in ovarian tissue.

14. Broccoli Rabe (Rapini - Cooked)

- Serving: 1 cup chopped (~85g)
- Energy: 33 kcal/100g | Carbs: 3.1g | Fiber: 2.7g | Protein: 3.8g | Fat: 0.5g
- Micronutrients: Vit A, Vit C (20.2mg), Vit K (224µg), Folate (83µg), Glucosinolates.
- Implementation: Bitter cruciferous veggie dense in Indole-3-Carbinol (I3C), promoting 2-hydroxyestrone metabolism over inflammatory 16-alpha-hydroxyestrone.

15. Swiss Chard (Cooked)

- Serving: 1 cup (~175g)
- Energy: 20 kcal/100g | Carbs: 4.1g | Fiber: 2.1g | Protein: 1.9g | Fat: 0.1g
- Micronutrients: Magnesium (81mg), Potassium (549mg), Syringic Acid, Betalains.
- Implementation: Syringic acid inhibits alpha-glucosidase activity; high magnesium concentration activates insulin receptor tyrosine kinase.

16. Bok Choy (Petchay - Cooked)

- Serving: 1 cup shredded (~170g)
- Energy: 12 kcal/100g | Carbs: 1.8g | Fiber: 1.0g | Protein: 1.6g | Fat: 0.2g
- Micronutrients: Calcium (158mg), Vit C (44mg), Vit A, Selenium.
- Implementation: Highly bioavailable bio-calcium with low oxalate content. Ideal non-dairy source for maintaining bone density during weight loss.

17. Green Beans (String Beans - Sitaw)

- Serving: 1 cup (~125g)
- Energy: 31 kcal/100g | Carbs: 7.0g | Fiber: 3.4g | Protein: 1.8g | Fat: 0.1g
- Micronutrients: Silicon, Vit C (12.2mg), Vit K, Lutein.
- Implementation: Moderate fiber, low glycation footprint. Provides dietary silicon for collagen synthesis and follicular connective tissue.

18. Radish (White/Red - Labanos)

- Serving: 1 cup sliced (~116g)
- Energy: 16 kcal/100g | Carbs: 3.4g | Fiber: 1.6g | Protein: 0.7g | Fat: 0.1g
- Micronutrients: Vit C (14.8mg), Potassium, Isothiocyanates, Myrosinase.
- Implementation: Contains sulfur compounds that stimulate bile production and enhance hepatic lipid oxidation, assisting in NAFLD mitigation.

C. CATEGORY: DAIRY

1. Greek Yogurt (Plain, 0%)

- Serving: 1 cup (~170g)
- Energy: 59 kcal/100g Carbs: 3.6g Protein: 10.2g Fat: 0.4g
- Micronutrients: Calcium (110mg), Vit B12, Probiotics.
- Implementation: Concentrated whey removal provides 2x protein of regular yogurt, blunting appetite via peptide YY stimulation.

2. Greek Yogurt (Plain, 2%)

- Serving: 1 cup (~170g)
- Energy: 73 kcal/100g Carbs: 3.9g Protein: 9.9g Fat: 2.0g
- Micronutrients: Calcium (115mg), Iodine, Probiotics.
- Implementation: Moderate fat content aids fat-soluble vitamin uptake (Vit A/D) and increases long-term satiety.

3. Unsweetened Almond Milk

- Serving: 1 cup (~240ml)
- Energy: 15 kcal/100g Carbs: 0.3g Protein: 0.6g Fat: 1.2g
- Micronutrients: Vit E (3.3mg), Fortified Calcium (120mg).
- Implementation: Zero-sugar dairy alternative; ideal for women experiencing dairy-triggered inflammatory flares or acne.

4. Unsweetened Soy Milk

- Serving: 1 cup (~240ml)

- Energy: 33 kcal/100g Carbs: 1.8g Protein: 2.8g Fat: 1.6g
- Micronutrients: Isoflavones, Fortified Calcium, Vit B12.
- Implementation: Complete plant protein source; naturally occurring isoflavones exert weak, protective estrogen-modulating effects.

5. Cottage Cheese (Low Fat)

- Serving: ½ cup (~113g)
- Energy: 81 kcal/100g Carbs: 4.7g Protein: 11.1g Fat: 2.3g
- Micronutrients: Calcium (86mg), Selenium, Phosphorus.
- Implementation: High slow-digesting casein protein content provides steady amino acid release, stabilizing nocturnal blood sugar.

6. Kefir (Plain, Low Fat) Serving: 1 cup (~243g)

- Energy: 43 kcal/100g Carbs: 4.8g Protein: 3.8g Fat: 1.0g
- Micronutrients: Probiotics (diverse live strains), Calcium.
- Implementation: Fermentation significantly enhances gut microbiome diversity, linked to reduced systemic LPS endotoxemia.

7. Feta Cheese

- Serving: 1 oz (~28g)
- Energy: 264 kcal/100g Carbs: 4.1g Protein: 14.2g Fat: 21.3g
- Micronutrients: Calcium (493mg), Phosphorus, Vit B12.
- Implementation: Aged sheep/goat cheese low in lactose; best utilized as an accent ingredient for flavor and lipid absorption.

8. Paneer (Cottage Cheese)

- Serving: 100g
- Energy: 265 kcal/100g Carbs: 3.2g Protein: 18.3g Fat: 20.8g
- Micronutrients: Calcium (480mg), Phosphorus.
- Implementation: High-protein vegetarian staple; provides dense amino acid substrate without elevating blood glucose.

9. Unsweetened Coconut Milk (Carton)

- Serving: 1 cup (~240ml)
- Energy: 19 kcal/100g | Carbs: 0.4g | Protein: 0.2g | Fat: 2.0g
- Micronutrients: Lauric Acid (MCT), Fortified Calcium (120mg), Vit B12.
- Implementation: Low-carb alternative rich in medium-chain triglycerides (MCTs) that bypass standard lymphatic fat transport for rapid hepatic energy conversion.

10. Unsweetened Hemp Milk

- Serving: 1 cup (~240ml)
- Energy: 25 kcal/100g | Carbs: 0.4g | Protein: 1.3g | Fat: 2.1g
- Micronutrients: Gamma-Linolenic Acid (GLA), Omega-3/6 ratio (1:3), Iron.
- Implementation: Contains GLA, an anti-inflammatory omega-6 derivative that modulates prolactin receptor sensitivity and alleviates premenstrual mastalgia.

11. Goat Cheese (Soft Chèvre)

- Serving: 1 oz (~28g)
- Energy: 268 kcal/100g | Carbs: 0.9g | Protein: 18.5g | Fat: 21.1g
- Micronutrients: A2 Beta-Casein, Calcium (140mg), Phosphorus, Vit A.
- Implementation: Predominantly A2 beta-casein structure; avoids BCM-7 inflammatory peptide release linked to A1 cow dairy, reducing gut irritation.

1. Chicken Breast (Skinless)

- Serving: 1 cooked breast (~120g)
- Energy: 165 kcal/100g Carbs: 0.0g Protein: 31.0g Fat: 3.6g
- Micronutrients: Niacin (B3), Vit B6, Selenium, Phosphorus.
- Implementation: Ultra-lean protein source; stimulates glp-1 release and supports skeletal muscle glucose disposal.

2. Chicken Thigh (Skinless)

- Serving: 1 cooked thigh (~100g)

- Energy: 209 kcal/100g Carbs: 0.0g Protein: 26.0g Fat: 10.9g
- Micronutrients: Zinc, Iron, Vit B12, Niacin.
- Implementation: Higher zinc and iron content than breast meat; zinc aids in androgen receptor down-regulation.

3. Salmon

- Serving: 1 filet (~120g)
- Energy: 206 kcal/100g Protein: 22.1g Fat: 12.3g Omega-3: 1.8g
- Micronutrients: Vit D (526 IU), Vit B12, Selenium.
- Implementation: Long-chain EPA/DHA reduces serum testosterone and vascular inflammation while Vit D supports follicular maturation.

4. Tuna (Yellowfin/Skipjack, Water)

- Serving: 1 can (~120g)
- Energy: 128 kcal/100g Carbs: 0.0g Protein: 28.0g Fat: 1.0g
- Micronutrients: Selenium, Niacin, Vit B12, Phosphorus.
- Implementation: Pure lean protein; high selenium content supports thyroid peroxidase activity and T4 to T3 conversion.

5. Eggs (Whole, Hard-Boiled)

- Serving: 2 large eggs (~100g)
- Energy: 155 kcal/100g Carbs: 1.1g Protein: 12.6g Fat: 10.6g
- Micronutrients: Choline (294mg), Vit D, Vit A, Lutein.
- Implementation: Yolk choline is required for VLDL assembly in liver, helping mitigate non-alcoholic fatty liver disease (NAFLD).

6. Egg Whites

- Serving: 4 large whites (~132g)
- Energy: 52 kcal/100g Carbs: 0.7g Protein: 10.9g Fat: 0.2g
- Micronutrients: Riboflavin (B2), Potassium.
- Implementation: Fat-free pure ovalbumin protein; ideal for adding volume and protein without adding dietary lipids.

7. Lean Beef Sirloin

- Serving: 1 steak (~120g)
- Energy: 183 kcal/100g Carbs: 0.0g Protein: 29.2g Fat: 6.7g
- Micronutrients: Heme Iron (2.6mg), Zinc (5.8mg), Vit B12.
- Implementation: Highly bioavailable heme iron addresses anemia risk from heavy menstrual bleeding common in anovulatory PCOS.

8. Pork Tenderloin

- Serving: 1 roast portion (~120g)
- Energy: 143 kcal/100g Carbs: 0.0g Protein: 26.2g Fat: 3.5g
- Micronutrients: Thiamin (B1 0.9mg), Vit B6, Zinc, Selenium.
- Implementation: Lean red meat alternative; thiamin acts as essential coenzyme in mitochondrial carbohydrate metabolism.

9. Firm Tofu

- Serving: 1 cup cubed (~126g)
- Energy: 144 kcal/100g Carbs: 2.8g Protein: 17.3g Fat: 8.7g
- Micronutrients: Calcium (683mg), Iron (2.7mg), Isoflavones.
- Implementation: Phytoestrogens bind ER-beta receptors, exerting favorable lipid-modulating and anti-androgenic effects.

10. Tempeh

- Serving: 1 cup (~166g)
- Energy: 193 kcal/100g Carbs: 9.4g Protein: 20.3g Fat: 10.8g
- Micronutrients: Manganese, Copper, Probiotics, Mag.
- Implementation: Fermented soy matrix enhances digestive bioavailability and delivers gut-friendly probiotic microorganisms.

11. Shrimp / Prawns

- Serving: 10-12 large (~100g)
- Energy: 99 kcal/100g Carbs: 0.2g Protein: 24.0g Fat: 0.3g

- Micronutrients: Selenium, Iodine, Vit B12, Astaxanthin. Implementation: Astaxanthin pigment provides potent antioxidant protection
- against follicular lipid peroxidation.

12. Turkey Breast (Skinless, Roasted)

- Serving: 1 portion (~120g)
- Energy: 135 kcal/100g | Carbs: 0.0g | Protein: 30.0g | Fat: 1.0g
- Micronutrients: L-Tryptophan, Selenium (31µg), Vit B6, Niacin.
- Implementation: Exceptional Tryptophan-to-LNAA ratio; supports serotonin and melatonin synthesis, stabilizing mood and circadian cortisol rhythms.

13. Sardines (Canned in Water / Olive Oil)

- Serving: 1 can drained (~92g)
- Energy: 208 kcal/100g | Carbs: 0.0g | Protein: 24.6g | Fat: 11.5g | Omega-3: 1.4g
- Micronutrients: Vit D (192 IU), Calcium (382mg), Vit B12 (8.9µg), Selenium.
- Implementation: Small, short-lived fish with near-zero heavy metal bioaccumulation. Delivers bone-in calcium and EPA/DHA to reduce hyperandrogenemia.

14. Tilapia (Fillet, Baked)

- Serving: 1 fillet (~116g)
- Energy: 128 kcal/100g | Carbs: 0.0g | Protein: 26.0g | Fat: 2.7g
- Micronutrients: Selenium (54µg), Vit B12, Phosphorus, Potassium.
- Implementation: Accessible, highly digestible lean fish protein. High selenium content supports thyroid deiodinase enzymatic conversion.

E. CATEGORY: OIL/ FATS

1. Extra Virgin Olive Oil

- Serving: 1 tbsp (~14g)
- Energy: 884 kcal/100g Fat: 100g 73% MUFA Vit E: 14.3mg
- Bioactives: Oleocanthal, Oleic Acid.
- Implementation: Natural COX-1/COX-2 inhibitor; reduces chronic vascular inflammation and improves endothelial dysfunction.

2. Avocado Oil

- Serving: 1 tbsp (~14g)
- Energy: 884 kcal/100g Fat: 100g 70% MUFA High Smoke Point
- Bioactives: Lutein, Vit E.
- Implementation: Heat-stable cooking oil rich in oleic acid; prevents toxic lipid peroxide formation during high-heat meal preparation.

3. Flaxseed Oil

- Serving: 1 tbsp (~14g)
- Energy: 884 kcal/100g Fat: 100g 53% ALA Omega-3
- Bioactives: Alpha-Linolenic Acid.
- Implementation: Highly heat-sensitive (use cold only); plant omega-3 precursor that suppresses proinflammatory arachidonic acid pathways.

4. Walnuts

- Serving: 7 whole nuts (~28g)
- Energy: 654 kcal/100g Fiber: 6.7g Protein: 15.2g Fat: 65.2g
- Micronutrients: ALA Omega-3 (9% total fat), Vit E, Polyphenols.
- Implementation: Uniquely high in plant omega-3s; clinical studies demonstrate improved lipid profiles and insulin sensitivity in PCOS.

5. Almonds

- Serving: 23 nuts (~28g)
- Energy: 579 kcal/100g Fiber: 12.5g Protein: 21.2g Fat: 49.9g
- Micronutrients: Vit E (25.6mg), Magnesium (270mg).
- Implementation: Rich in oleic acid MUFA; shown to reduce free androgen index (FAI) and improve serum lipid ratios.

6. Pumpkin Seeds (Pepitas)

- Serving: 1 oz (~28g)
- Energy: 559 kcal/100g Fiber: 6.0g Protein: 30.2g Fat: 49.0g
- Micronutrients: Zinc (7.8mg), Mag (592mg), Iron.

- Implementation: High zinc content inhibits 5-alpha reductase enzyme, slowing peripheral conversion of testosterone to potent DHT.

7. Sunflower Seeds

- Serving: 1 oz (~28g)
- Energy: 584 kcal/100g Fiber: 8.6g Protein: 20.8g Fat: 51.5g
- Micronutrients: Vit E (35.2mg), Selenium (53µg).
- Implementation: Delivers over 100% RDI Vit E per portion; neutralizes lipid peroxides in granulosa cells.

8. Sesame Seeds (Til)

- Serving: 1 tbsp (~9g)
- Energy: 573 kcal/100g Fiber: 11.8g Protein: 17.7g Fat: 49.7g
- Micronutrients: Sesamin (Lignan), Calcium (975mg).
- Implementation: Sesamin lignans inhibit delta-5-desaturase enzyme, lowering proinflammatory lipid mediator cascade synthesis.

9. Macadamia Nuts

- Serving: 10-12 nuts (~28g)
- Energy: 718 kcal/100g Fiber: 8.6g Protein: 7.9g Fat: 75.8g
- Micronutrients: Thiamin (B1), Manganese, Palmitoleic Acid.
- Implementation: 80% MUFA fat profile; low net carb content helps maintain steady ketone/glucose homeostasis.

10. Brazil Nuts

- Serving: 1-2 nuts (~5g)
- Energy: 656 kcal/100g Fiber: 7.5g Protein: 14.3g Fat: 66.4g
- Micronutrients: Selenium (1917µg/100g).
- Implementation Note: Just ONE nut provides 100% Daily Value of selenium; optimizes thyroid hormone deiodinase activity.

11. Virgin Coconut Oil Serving: 1 tbsp (~14g)

- Energy: 862 kcal/100g Fat: 100g 86% Saturated (MCTs)
- Bioactives: Lauric Acid, Caprylic Acid.
- Implementation: Rapidly oxidized in liver for energy; specify moderate portioning in database to manage saturated fat budget.

12. Chia Seeds

- Serving: 2 tbsp (~28g)
- Energy: 486 kcal/100g | Carbs: 42.1g | Fiber: 34.4g | Protein: 16.5g | Fat: 30.7g
- Micronutrients: ALA Omega-3 (5g/serving), Calcium (179mg), Magnesium (95mg).
- Implementation: Net carbs = 2g per serving. Soluble mucilage forms a gel matrix that slows gastric emptying and improves postprandial glucose stability.

13. Hemp Seeds (Hemp Hearts)

- Serving: 3 tbsp (~30g)
- Energy: 553 kcal/100g | Carbs: 8.7g | Fiber: 4.0g | Protein: 31.6g | Fat: 48.8g
- Micronutrients: GLA, Zinc (9.9mg), Magnesium (700mg), Iron (8mg).
- Implementation: Ideal 3:1 Omega-6 to Omega-3 ratio + GLA. Exceptionally high zinc/magnesium density supports progesterone synthesis.

14. Pecans

- Serving: 19 halves (~28g)
- Energy: 691 kcal/100g | Carbs: 13.9g | Fiber: 9.6g | Protein: 9.2g | Fat: 72.0g
- Micronutrients: Gamma-Tocopherol (Vit E), Manganese (4.5mg), Zinc.
- Implementation: Highest total polyphenol content among tree nuts. Gamma-tocopherol form of Vit E protects vascular endothelial lining from ROS damage.

EXERCISE LIBRARY (Page 22)

Stronger today, better every day. SMALL STEPS, BIG CHANGES.

WORKOUTS - Explore all workout routines for every level and goal.

ACTIVITY CALENDAR - Track the days you exercised and see your activity pattern

BENEFITS OF EXERCISE - Learn how regular exercise supports your body and mind

WARM-UP & COOL-DOWN - Prepare your body before and after workouts

TODAY'S FOCUS

Stay Connected

This Week

4/7 Days

Great job! Keep it up!

Current Streak

You’re on a roll

4 Days

WORKOUTS (Slide 23)

Choose a type of workout that fits your goals and how you feel today.

STRENGTH TRAINING

build strength, tone muscles, and boost your metabolism

CARDIO WORKOUTS

Improve your health and increase your stamina.

FLEXIBILITY AND MOBILITY

Improve your range of motion and reduce muscle tightness.

LOW-IMPACT WORKOUTS

Gentle movement that’s easy on your joints.

REMEMBER

Choose what you enjoy and stay consistent. Every move counts!

STRENGTH TRAINING (Slide 24)

Build strength, tone muscles, and boost your metabolism.

Choose a workout that fits your goals and start moving!

Squat

Strengthen your legs and glutes.

Push-Up

Build upper body strength and core stability

Dumbbell Row

Strengthen your back and improve posture.

Lunge

Tone your legs and improve balance

Dumbbell Shoulder Press

Strengthen your shoulders and upper arms.

Glute Bridge

Activate your glutes and strengthen your lower body.

SQUAT (Slide 25)

Squat

A powerful lower body exercise that strengthens your legs and glutes, and improves overall lower body strength.

Targets

Quadriceps, hamstrings, and glutes

Benefits

Builds strength, tones muscles, improves posture and balance.

HOW TO DO IT

1. Stand with your feet shoulder-width apart, toes slightly turned out.

2. Lower your hips back and down as if sitting on a chair.

3. Keep your chest up and knees behind your toes.

4. Push through your heels to stand back up.

5. Repeat for the desired number of repetitions.

MUSCLES WORKED

TIPS

- Keep your core tight.
- Don’t let your knees collapse inward.
- Focus on control, not speed.
- Breathe in as you lower your body, breathe out as you stand up.

REPS

8-12

SETS

3-4

LEVEL

Beginner to Intermediate

PUSH-UP (Slide 26)

PUSH-UP

A classic upper body exercise that builds strength in your chest, shoulders, triceps, and core.

Targets

Chest, shoulders, triceps, and core

Benefits

Builds upper body strength, improves core stability and overall endurance.

HOW TO DO IT

1. Start in a plank position with your hands slightly wider than shoulder-width apart.

2. Keep your body in a straight line from head to heels.

3. Lower your body until your chest is just above the floor.

4. Push through your palms to return to the starting position.

5. Repeat for the desired number of repetitions.

MUSCLES WORKED

TIPS

- Keep your core tight.
- Don’t let your hips sag.
- Lower your body with control.
- Breathe in as you lower down, breathe out as you push up.
- Modify on your knees if needed.

LEVEL

Beginner to Intermediate

DUMBBELL ROW (Slide 27)

Dumbbell Row

A pulling exercise that strengthens your back muscles and improves posture.

Targets

Back, Biceps, and Rear Shoulders

Benefits

Strengthens your back, improves posture, and reduces back pain.

HOW TO DO IT

1. Place your left hand and knee on a bench.

2. Hold a dumbbell in your right hand with your palm facing your body.

3. Pull the dumbbell up toward your hip, squeezing your back muscles.

4. Slowly lower the dumbbell back to the starting position.

5. Repeat for the desired number of repetitions, then switch sides.

MUSCLES WORKED

TIPS

- Keep your back straight and core engaged.
- Don’t twist your torso.
- Pull with your elbow, not your hand.
- Squeeze your back muscles at the top.
- Use a weight that allows good form.

LEVEL

Beginner to Intermediate

LUNGE (Slide 28)

Lunge

A lower body exercise that strengthens your legs, glutes, and improves balance and stability.

Targets

Quadriceps, Hamstrings, Glutes, and Calves

Benefits

Builds lower body strength, improves balance and stability, and supports functional movement.

HOW TO DO IT

1. Stand tall with your feet hip-width apart.

2. Step forward with one leg and lower your hips until both knees are bent at about 90 degrees.

3. Push through your front heel to return to the starting position, then switch legs.

MUSCLES WORKED

TIPS

- Keep your torso upright.
- Your front knee should be aligned over your ankle.
- Don’t let your front knee pass your toes.
- Engage your core for balance.
- Push through your front heel as you rise.
- Take controlled steps.

REPS

10-15 each leg

SETS

3-4

LEVEL

Beginner to Intermediate

DUMBBELL SHOULDER PRESS (page 44)

An upper body exercise that strengthens your shoulders, upper chest, and triceps.

Targets

Shoulders, Upper Chest, Triceps

Benefits

Builds shoulder strength, improves posture, and supports daily upper body movements.

HOW TO DO IT

1. Sit on a bench with back support and hold a dumbbell in each hand at shoulder height.

2. Press the dumbbells overhead until your arms are fully extended.

3. Slowly lower the dumbbells back to shoulder height.

TIPS

• Keep your back supported.

• Engage your core.

• Don't lock your elbows at the top.

• Avoid arching your back.

• Use a weight that challenges you but allows good form.

• Breathe out as you press up, breathe in as you lower down.

GLUTE BRIDGE (page 45)

A lower body exercise that strengthens your glutes, hamstrings and lower back while improving hip stability.

Targets

Glutes, Hamstrings, Lower Back

Benefits

Strengthens and tones your glutes, improves hip stability, and supports lower back health.

HOW TO DO IT

1. Lie on your back with your knees bent and feet flat on the floor, hip-width apart.

2. Engage your core and glutes, then lift your hips up until your body forms a straight line from shoulders to knees.

3. Slowly lower your hips back down to the starting position.

TIPS

• Keep your core engaged.

• Squeeze your glutes at the top.

• Don't arch your lower back.

• Keep your knees aligned with your hips.

• Breathe out as you lift, breathe in as you lower.

Cardio Workouts (page 46)

Improve your heart health, burn calories, and boost your endurance.

Running

A great full-body cardio exercise that improves endurance and burns calories

Jump Rope

A simple but effective cardio that improves coordination, endurance, and burns calories.

High Knees

A high-intensity cardio move that boosts heart rate and strengthens your legs.

Zumba

A fun dance workout that improves cardiovascular health while burning calories.

Cardio Tip

Aim for at least 150 minutes of moderate- intersity cardio each week for a healthier you!

Jump Rope (page 48)

A simple but effective cardio exercise that improves endurance, coordination, and burns calories.

Benefits

improves cardiovascular health, boosts endurarance, and helps burn calories.

Calories Burned

Appoximately 200-400 kcal

(20 minutes)

High Knees page 49

A simple a cardio exercise that increases your heart rate, improves agility, and burns calories.

Benefits

Improves cardiovascular health, boosts endurance, increases agility, and burns calories.

Calories Burned

Appoximately 200-300 kcal

(15-20 minutes)

Zumba page 50

A fun and energetic dance workout that combines cardio and movement to improve fitness and boost mood.

Benefits

Improves cardiovascular health, boosts endurance, burns calories and reduces stress.

Calories Burned

Appoximately 300-500 kcal

(30 minutes)

Slide 51: Flexibility & Mobility

Subtitle: Gentle movements to improve your range of motion, reduce muscle tightness, and support an active, healthy lifestyle.

Tagline: Move Well, Feel Better Everyday. A more flexible you is a healthier you.

Benefits:

Improves Flexibility: Helps your muscles move more freely.

Reduces Muscle Tightness: Helps ease stiffness and discomfort.

Supports Relaxation: Gentle stretching can help you feel calm.

Supports Overall Health: Physical activity contributes to overall well-being.

Stretches:

Neck Stretch: Gently tilt your head to one side. Hold for 15–30 seconds. Repeat on both sides.

Shoulder Stretch: Bring one arm across your chest. Hold for 15–30 seconds. Repeat on both sides.

Hamstring Stretch: Sit with one leg extended and reach toward your toes. Hold for 15–30 seconds.

Butterfly Stretch: Sit with the soles of your feet together and let your knees fall to the sides. Hold for 15–30 seconds.

Remember: Stretch gently, breathe normally, and never force a movement. Move at your own pace and listen to your body.

Slide 52: Low-Impact Workouts

Subtitle: Gentle movements that are easier on your body and support an active lifestyle.

Benefits:

Joint Friendly: Less stress on the knees, hips, and other joints.

Boosts Mood: Helps reduce stress and improve mood.

Supports Weight Management: Helps maintain a healthy weight.

Better Balance: Improves stability and body control.

Examples (Try these gentle activities):

Walking

Cycling

Swimming

Low-Impact Dance

Remember: Every movement counts. Choose an activity you enjoy and make it a part of your day. A healthier you is a happier you.

Slide 54: Benefits of Exercise

Header Title: Benefits of Exercise

Subtitle: A healthier you, today and tomorrow.

Key Benefits:

Supports Heart & Metabolic Health: Regular exercise helps improve heart health, blood circulation, and supports healthy blood sugar and cholesterol levels, which may help lower the risk of metabolic problems often associated with PCOS.

Helps Maintain a Healthy Weight: Physical activity helps manage body weight and body composition, which can support a healthier lifestyle and may reduce weight-related concerns in PCOS.

Supports Reproductive and Hormonal Health: Exercise can help improve insulin sensitivity and may support healthy menstrual cycles and overall reproductive health in women at risk for PCOS.

Boosts Mood and Reduces Stress: Regular physical activity can help reduce stress, anxiety, and low mood, and improve overall mental well-being and quality of life.

Builds Stronger Muscles and Bones: Exercise helps increase muscle strength, endurance, and bone density, making everyday activities easier and supporting long-term health.

Slide 55: Warm-up & Cool-down

- **Header Title:** Warm-up & Cool-down
- **Subtitle:** Warm-up & Cool-down
- **Tagline:** Prepare your body, Recover with care.
- **Overview Note:** A proper warm-up prepares your body for exercise, while a cool-down helps your heart rate and breathing gradually return to normal. Both can help you exercise more safely and feel better after your workout.

Warm-Up (5–10 minutes)

Get your body ready

1. **Start with light movement:** Walk slowly or do gentle movements.
2. **Move your joints:** Try gentle arm circles, shoulder rolls, and leg movements.
3. **Gradually increase your movement:** Prepare your muscles and heart for exercise.

- **Why warm-up?:** Helps gradually increase heart rate, breathing, muscle temperature, and flexibility.

Cool-Down (5–10 minutes)

Slow down gradually

1. **Walk slowly:** Walk slowly or do gentle movements.
2. **Do gentle stretching:** Stretch your muscles without bouncing.
3. **Breathe normally:** Allow your heart rate and breathing to return toward normal.

- **Why cool-down?:** Helps your body transition from exercise to rest and supports recovery.

Benefits

- **Helps prevent injuries**
- **Supports physical performance**

- **Reduces muscle soreness**
- **Helps you feel better after workouts**

Remember

- Don't stop suddenly after intense exercise. Give your body time to slow down and recover.
